This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

A FEW words are needed, not only to explain what this Index is, but also what it is not. It is an index of the Peerages and Baronetages of the United Kingdom, showing the date when each separate title was conferred, the changes which they underwent, and their present condition, whether existent, modified, dormant, or extinct. It is therefore a guide or reference to the existing and extinct Peerages and Baronetages of England, Scotland, and Ireland. It has no pretensions to be a Peerage, or in any way to take the place of the valuable works of Burke, Lodge, Debrett, and others; these volumes now form a small library in themselves, and the present index is merely designed to point out in which of the Peerages or Baronetages any given title is to be found.

It might at first be supposed that a combination of the existing Peerage or Baronetage with the extinct, would supply all the information which a reader could require, but this is not the case; titles are frequently merged or changed in a manner which renders the tracing of them, without an index, very difficult, if not almost impossible. One practical illustration will explain this better than any argument. Some years ago the compiler of this Index was asked by a friend, who had just taken "Amyand" House, to inform him who Sir —— Amyand, Baronet, was? Reference to the current Baronetages of England, Scotland, and Ireland, showed that no such title was in existence; and reference to the extinct Baronetages did not show that the title was extinct. The inquirer was at fault, and it was not till some weeks later, when, by the aid of *Serendipity*, as Horace Walpole called it—that is, looking for one thing, and finding another—that the explanation was

accidentally found that the Baronetcy conferred by George III. on the son of his grandfather's skilful medical attendant, Claudius Amyand, in 1764, had, for very good family reasons, been changed into Cornewall by the second Baronet, in 1771, under which title, therefore, the Baronetcy is now to be found.

Another way in which all apparent record of a title may be lost is by absorption in a superior dignity; thus, a Baronetcy may be merged in a Peerage, and hence be found neither in the existing, nor in the extinct Baronetage. This source of confusion is considerably increased by the fact that, a title thus lost, may, after a time, re-appear. A good illustration of this is afforded by the noble family of Liddel of Ravensworth, who were raised to the Baronetcy by Charles I. in 1642. After 105 years the title of Liddel, Bart., was lost, being merged in the Barony of Ravensworth, which was created by George II., in 1747. This title expired in 1784, and then the old Liddel Baronetcy revived and continued till 1821, when George IV. created Sir Thomas Henry Liddel, Baron Ravensworth. Thus, the Baronetcy conferred in 1642 was merged in a higher dignity from 1747 to 1784, was then held as an independent title from 1784 to 1821, and again merged in a superior dignity, and thus twice practically lost for a time, though never extinct.

A third source of trouble to students of history is the distinction of titles into British, English, Scottish, and Irish. Lord Aberdeen, for example, was Prime Minister of Great Britain, and a Peer of England, yet his name is not to be found in that most valuable book, *The Historic Peerage of England* [Nicolas, by Courthope, 1857], unless the searcher happens to remember that his English title was that of Baron Gordon, which, perhaps, not one in a thousand would think of; thus, the lower title being English, necessarily only appears, whilst the superior title of Earl, being Scottish, has no place in the work.

When a title is a territorial one, the local situation often affords no clue to its national character; thus, the title of Viscount Canada is not more suggestive of a Scottish, than of an Irish or English Peerage. In the same way, when the family name clearly points to a distinct nationality, it does not

at all necessarily follow that, if elevated to the peerage, it is to be found in the peerage of that particular country. Thus the family of MacKenzie, of Kintail, has been thrice ennobled under the title of Seaforth, first the peerage of Scotland as Earl of Seaforth in 1623, and forfeited that honour in 1715; a second time created Earl in the peerage of Ireland in 1771, which title became extinct in 1781; and a third time ennobled in the peerage of England in 1797 as Baron Seaforth, the title becoming extinct in 1815. Hence, if we seek to know something about "Lord Seaforth," the title is not now to be found in the peerage; if the title is mentioned in past history, the holder must be sought for between 1623 and 1715 in the Peerage of Scotland; between 1771 and 1781 in that of Ireland; and between 1797 and 1815 in that of the United Kingdom.

From the constant changes which every year necessarily produces in registers of this sort, the large number of dates which they contain, and the facility with which an error once accidentally introduced is copied and carried on from year to year; the amount of confusion which exists in Peerages and Baronetages is necessarily very large. The following index is therefore very far from perfect; but even in its present imperfect form it will be of some assistance to readers, and will form the basis of a more comprehensive and perfect index hereafter.

As a rule mere titles of courtesy have been left out, or only introduced as steps of preferment in the higher titles to which they now form adjuncts.

It will be observed that in the case of a considerable number of Baronetcies a doubt exists whether they are extinct or not, which is indicated by the mark (?). Emigration, loss of evidence, family misfortunes, and in some instances a disinclination to claim a title the means to support which are for a time wanting, etc., have led to this; and, moreover, as in some creations, such especially as those of Scotland or Nova Scotia, the dignity being not only to direct male descendants, but to heirs general, it is scarcely possible ever to declare the title truly extinct, as an heir of line may unexpectedly appear at almost any subsequent time, and the evidence which may be deemed

satisfactory to a local jury, would of course be considered equally good in establishing a claim to family rights and to family hereditary honours, though not in all cases such as would be required in proving heirship to property. The admission of a title into the following index does not, therefore, convey any assertion as to the validity of the right to hold it of the present possessor of it, but only points to the fact that it has been, or is, admitted into Peerages and other similar records of titles.

It may not be useless to observe that the spelling of titles as well as of family names, in past years, has been subject to many variations, and it is a task of no little difficulty to determine with accuracy, or on authority, which are correct, and which are erroneous. As far as mere reference to books is concerned, it would be easy to show many good authorities which give a name with a final *e* or double *ll*, and quite as many which give it without the final *e*, and with only a single *l*. Reference to signatures in documents is also far from conclusive, for till very recently men in high positions not only were very indifferent as to the correct spelling of their names, but sometimes affected singularities and variations which it would be almost impossible now to index. Men whose family names had become tainted in the times of rebellion were very prone to make a slight change in spelling their names, as though to lead to the impression that they did not belong to the same line as the disaffected or unloyal family; but subsequent generations, becoming proud of showing their kinship to eminent predecessors, were willing to call rebellion patriotism, and gloried in resuming an old family name in its original form.

A very considerable part of the labour of compiling this index arose from the fact, that in the works from which it was formed, which of course represent generally "the titles of the year," and therefore give little or no reference to those which had become extinct since the last edition, the evidence sought for had often to be taken from omission rather than from direct statements. Hence, on further inquiries, it sometimes appeared that a title had been left in from year to year, because the

editor had not heard of the death of the holder; whilst, curiously enough, in other instances a title was left out because the editor had received no notice of the fact that the holder was still alive. These uncertainties are especially common in the Baronetages. In the case of Hudson, of Melton Mowbray, created a Baronet in 1660, Sir Charles, the seventh Baronet, was born in 1755, and succeeded his father in 1773, and his name appeared in Baronetages for eighty years. When he was, according to these statements, a century old, his name was left out, apparently on the general probability that he was no longer alive.

In the following pages every entry purports to give shortly the history of the title which commences the line; if the entry terminates with an arrow pointing forward →, the title is now in existence, and is to be found in the current Peerages or Baronetages. If the entry terminates with an arrow reversed ←, then the title is extinct and must be sought for in extinct Peerages or Baronetages. When there is no arrow at the end of the entry, the title is either dormant, or merged in some other title, under which, reference to it may be found. The first given date always shows the year when the title was created, and the last date shows when it ceased to be held, or when it merged in some other title.

May I hope that those who use the index will aid in correcting all the numerous erroneous statements which it must necessarily contain; so that it may hereafter become, not merely an index of certain books, but what would be far more valuable, an index of facts.

EDWARD SOLLY.

SUTTON, SURREY,
January, 1880.

EXPLANATORY NOTE.

SMALL CAPITALS are used to indicate each Title.

Italics distinguish Family names.

S. marks all Scotch titles.

I. is applied to all Irish titles.

All those titles which have no distinguishing letter thus appended, are English or of the United Kingdom.

s.p. These letters only indicate that there was no heir able to succeed to the title.

→ shows that the title is now existing.

← shows that it is extinct.

All those titles which have no arrow at the end are either merged in some other title, dormant, or in abeyance.
